## **BOOK SYNOPSIS**

Why does the United States Center for Disease Control recommend that babies receive 45 injections of toxic substances known as "vaccinations" by the time they are 6 months old? When did the police powers of the state start dictating personal health care choices and foist upon men, women and children of all ages compulsory medical procedures such as vaccinations? According to James, The Vaccine Religion is a 21st century Mass Mind Virus marketed by a multi-billion dollar hospital, drug, and insurance racket and reinforced by the World Health Organization, the United States Government and mainstream media. James argues that no one has ever proven the efficacy of any vaccine, nor has anyone proven that vaccinating a population against a specific disease led to the decline or total elimination of that disease.
